# Creating a New Marketplace

When setting up a new Marketplace you only need to configure a few settings within NCompass to activate a new Marketplace. This will vary sightly between different marketplace integrations. this guide will follow the general steps for the B&Q integration.

# Create a new Web-Site

We will need to create a brand new web-site within NCompass where we will assign the integration type and select the Marketplace Channel.

---

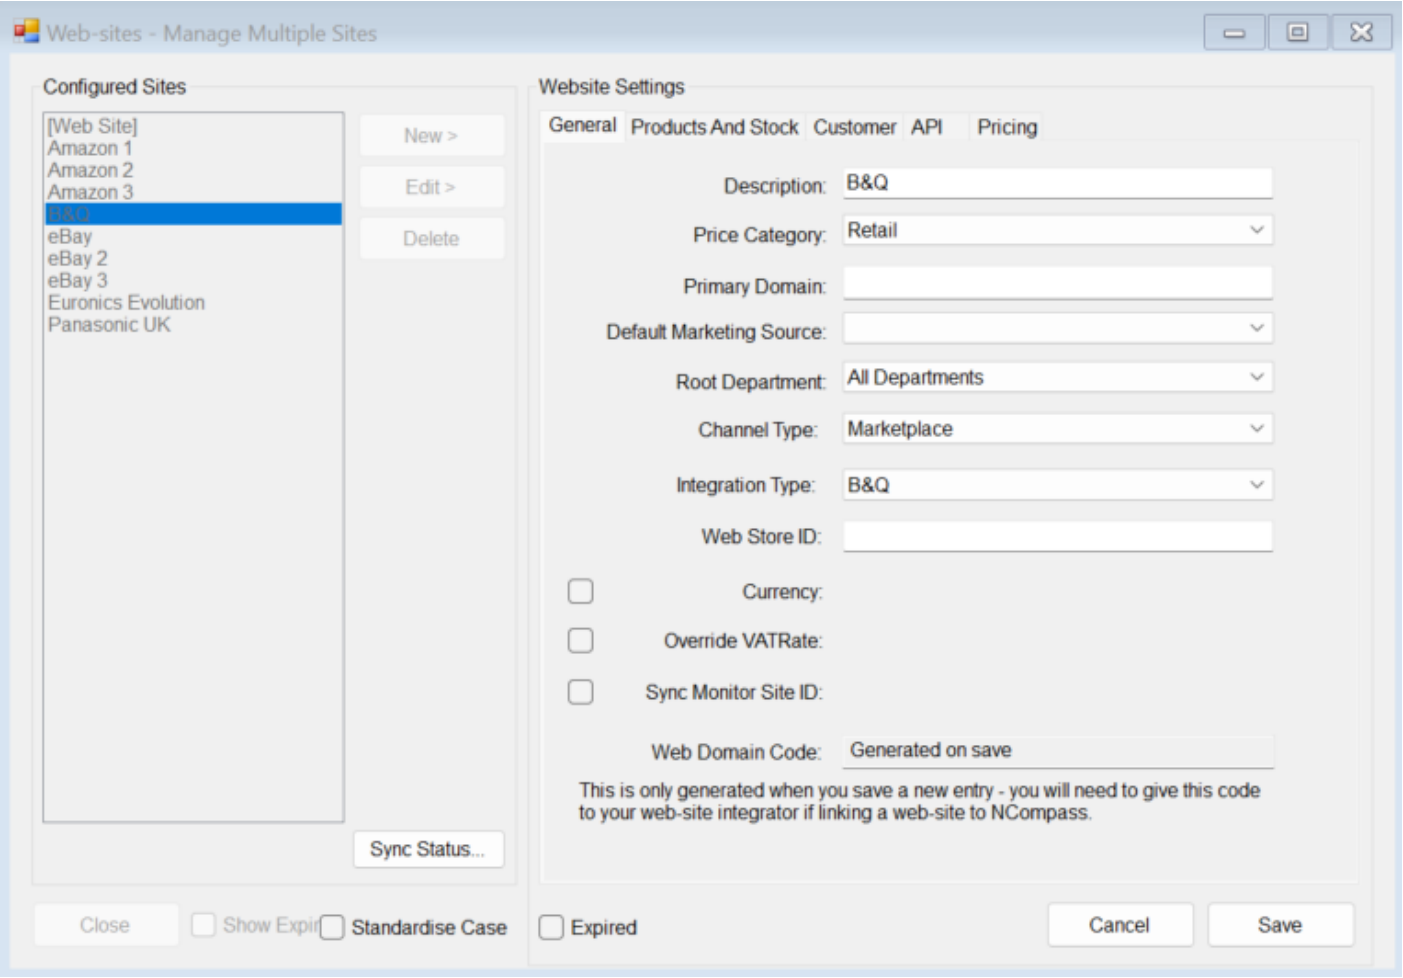
## Step 1 - Making a new Web-Site

On NCompass, go under Administration > Multi-Channel > Web Sites

Create a new website by pressing "New". Give it a descriptive name and select a corresponding price category to list product pricing under.

Set the Channel Type to "Marketplace"

Select the integration type (in this case B&Q)



Press save and you can move on to the next step.

> **Other settings are optional, this guide is covering the bare minimum setup to link a marketplace**

# Step 2 - Set Marketplace Settings

Go Back to Administration > Multi-Channel > Marketplace Settings

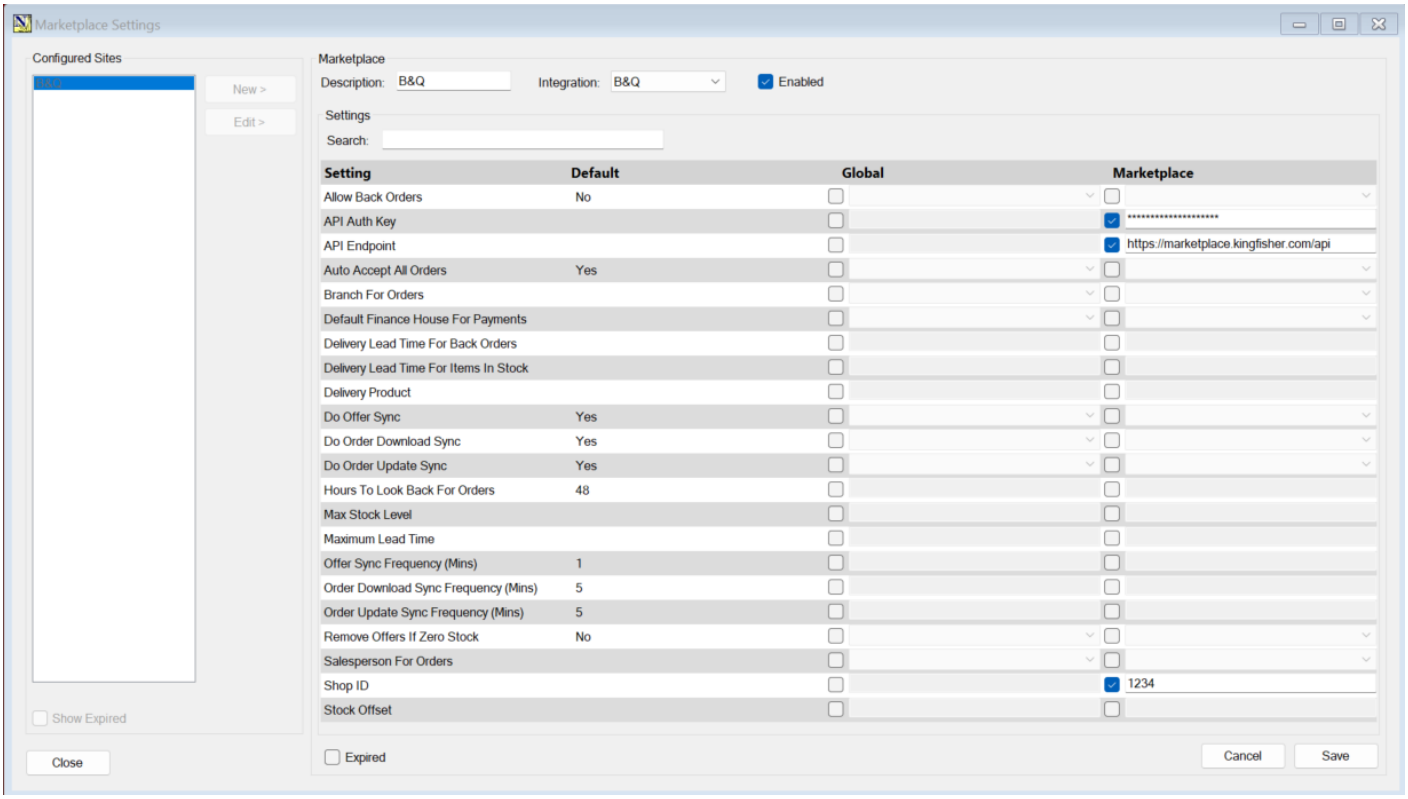
Select the new Marketplace Web-Site name you've just created and press Edit > (It will appear if you chose marketplace channel type on Web-sites administration)

You can update the description here and ensure the integration matches the one set within web-sites

Make sure the marketplace is **enabled**

## The following settings are needed for API calls to B&Q:

1. **API Endpoint**
2. **Shop ID**
3. **API Auth Key**



All you need are the 3 settings above for the minimum B&Q setup

> The vast majority of marketplace configs will be present within this Tab instead of Tools > Config

## Final Considerations:

- Create an unmatched product, ensure there is an unmatched web product linked to an actual unmatched item otherwise downloaded orders without a product link will return a BLANK sundry line
