

Creating Marketplace Offers

Creating marketplace offers is done under the Web/Online Details tab of a product, managed next to all other web sections.

Product Enquiry > Search for a product > Right click product > Select Web/Online Details > Navigate to Marketplace Tab

The screenshot shows a web browser window titled "Web + multi-channel settings for TLC 65Q6C 65Inch 4K Uhd Mini Led Smart TV Wifi Google TV". The "Marketplaces" tab is selected and highlighted in red. The interface includes a top navigation bar with tabs for "Images and Main Content", "Amazon", "eBay", "Euronics", "Default Web Content", and "Marketplaces". Below the navigation bar, there is a "Marketplace:" dropdown menu and a "Show Expired" checkbox. A table with columns "Marketplace", "Product ID", "Offer ID", "Start Date", and "End Date" is currently empty. To the right of the table are buttons for "Prices...", "View Product Online", "Web Review...", "Debug", and "EPI+/PIM Not Linked Link...". Below the table, there is an "Offer" section with "Add New", "Add Using", "Edit", and "Delete" buttons. The "Offer" section includes a "Marketplace:" dropdown, "Product ID:" and "Offer ID:" input fields, a "Check" button, and a "Search:" input field. Below these are "Starts:" and "Ends:" date and time pickers, and an "Expired" checkbox. A table with columns "Setting", "Default", and "Offer" is also present, with rows for "Allow Back Orders", "Delivery Lead Ti...", "Delivery Lead Ti...", and "Max Stock Level". At the bottom right of the "Offer" section are "Cancel" and "Save" buttons.

After reaching this tab, to create an offer you just need to press "Add New"

Select the marketplace of your choosing.

If B&Q is selected it will auto populate the Product ID using EAN - You can press "Check" to see if this is a B&Q catalogue product (This checks with B&Q to see if its an available product in the existing catalogue)

You can then enter a pre-existing offer ID to link an active B&Q offer or leave it blank and NCompass will create a new one

NCompass does not auto-link offers, they either need to be created or manually linked by entering offer ID

B&Q Marketplace links all products using EAN

You can then press Save to create the offer -

The screenshot shows a software interface for managing product offers. At the top, there are tabs for 'Images and Main Content', 'Amazon', 'eBay', 'Euronics', 'Default Web Content', and 'Marketplaces'. Below these, there's a 'Marketplace' dropdown menu and a 'Show Expired' checkbox. A table with columns 'Marketplace', 'Product ID', 'Start Date', 'End Date', and 'Offer ID' is currently empty. On the right side, there are buttons for 'Prices...', 'View Product Online', 'Web Review...', 'Debug', and 'EPI+/PIM' (which is highlighted). Below 'EPI+/PIM' is a 'Not Linked' status and a 'Link...' button. At the bottom, there are 'Cancel' and 'Save' buttons.

Offer

Marketplace: B&Q

Product ID: 8806097413530 Samsung UE65U8020FKXXU 65inch Crystal UHD 4K
Locked to product EAN

Offer ID: Will be generated if left blank

Search:

Setting	Default	Offer
